# Ballmer: 'Linux is a cancer'

## Contaminates all other software with Hippie GPL rubbish

Thomas C Greene

Sat 2 Jun 2001 // 18:19 UTC

Microsoft CEO and incontinent over-stater of facts Steve Ballmer said that "Linux is a cancer that attaches itself in an intellectual property sense to everything it touches," during a commercial spot masquerading as a interview with the *Chicago Sun-Times* on June 1, 2001.

Ballmer was trying to articulate his concern, whether real or imagined, that limited recourse to the GNU GPL requires that all software be made open source.

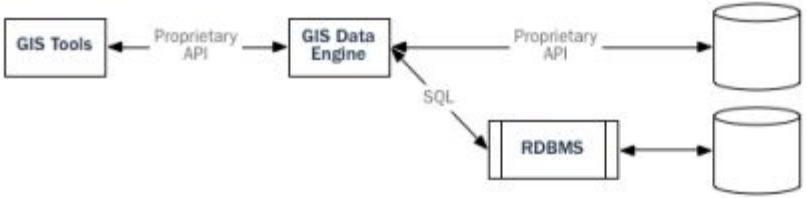
## Evolution of GIS Architectures

### First-Generation GIS:

Geometry, indexes, and attributes stored in file system

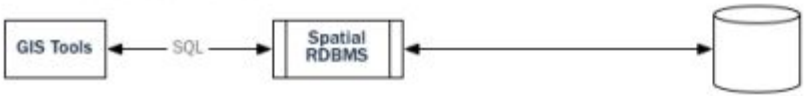
### Second-Generation GIS:



Geometry, indexes, and attributes stored in file system (may also be stored in BLOBs in RDBMS)

Attributes stored in RDBMS tables

### Third-Generation GIS:



Geometry stored in ADTs in RDBMS tables with related business data

Has OGC Lost its Way?
By Arup Dasgupta - 06/25/2013 8 Minutes Read
Geoservices REST API, an implementation specification by Esri which was to come up for voting for adoption at OGC, has created uproar in the geospatial community. Even though Esri has now withdrawn the specification from voting, questions remain over OGC's role and vision
